## Invalid Electronic Serial Number Hp Error

HP Business Desktops - How to fix invalid electronic serial number in BIOS. Problem. After replacing the system board, booting the device causes an error. After replacing the motherboard in an HP desktop computer, when I try to boot it, I get the following error: "BIOS storage area size exceeded". I believe that I can't change anything with the BIOS because it wasn't there from the beginning. I even tried booting the computer without using BIOS, it still won't boot it. Ideally, I'd like to keep the BIOS and just use it in the future, so I'd like to do something like a backup of this partition.
