(Click [HERE](#) to download) * My Secrets Vault for Mac is available to download and use right now! (Click [HERE](#) to download) * My Secrets Vault for iOS is available to download and use right now! (Click [HERE](#) to download) * Follow us on Facebook [HERE](#) * Please click [HERE](#) for Support and Feedback to let us know how we are doing and what else you would like to see in the future. My Secrets Vault Features: * Stores up to 10,000 accounts with up to 10,000 passwords * Encrypt your account information (with strong AES algorithms) to give you a peace of mind * No Cost to use this feature. There is a nominal fee to purchase something on our website, such as a custom server. Your My Secrets Vault data is free to keep with that purchase. * Syncs across all of your devices * Saves your data on a file, so if you lose the computer, you have your important information available * Change Account or Password with just a few clicks. It's very quick to change it if you lose your password * Control every aspect of your encrypted data * Set your own passwords * Tags * Transfer your data to another computer * Manage your Account Information easily with your My Secrets Vault Web Interface. You can quickly create new accounts and change them as well. My Secrets Vault Requirements: * Internet access to My Secrets Vault Web Interface * Minimum of 2 Gbps Internet Service * Minimum of 128 Meg of RAM * Free Disk Space at least 1 Gig to store encrypted data My Secrets Vault is a tiny and quick application. It is designed to be a true utility application which can quickly and easily be put into place. My Secrets Vault for Windows is one of the worlds most secure applications that has been designed to store all of your sensitive information. All of your stored information is encrypted using the latest AES-256 ciphers and is protected by 256 bit secure passwords. This means that all of your account information, your password, your email

What's New In?

This program allows you to store financial information, software, and your web site login information, all in one convenient and secure location on your computer. This program can also be used to encrypt your sensitive information. Everything is stored in an encrypted format, so no one can access or alter your information without your permission. Although this program can store and encrypt a great deal of information, its main purpose is to store information pertaining to your financial accounts, software, and website login information. As a peace of mind, your information can only be accessed with your permission, and only when you use it. This way, you are more likely to remember to use the encrypted form of the information. Although the main purpose of this program is to store your information in an encrypted and secure manner, it is also easy to use and understand. You can easily choose a file that you want to encrypt, or you can even encrypt using the standard dialog box. Once you are done with the password, you can then simply save the file and nothing more will happen. The encrypted file can then be easily moved to your desktop by clicking the file name. You can then navigate to any folder on your computer to access the file. By moving your encrypted file into the correct location, the program automatically encrypts the file and creates a password if you do not provide one. Although this program is easy to use and understand, it is still very secure and a good idea to use to store your sensitive information. ***CONTAINS THE SAME PASSWORD AS YOUR EMAIL ACCOUNT*** This download supports windows 7, windows 8, windows 10, windows Vista, windows XP, windows 2000, windows 98, windows 3.11, Windows Me and all others that Windows NT. IF YOU WANT TO USE ANOTHER PASSWORD PLEASE CLICK MY THOUGHTS AND FEELINGS RECOMMENDED MEMBERSHIP RESOURCES LINKS AND COMPETITION NEWS ADDED DUE TO REQUESTS
