Insight: Design Cool Factor is a game about building a robot with your mind. You are a 3D designer, with "poly-skills" (where you use your mind to combine objects to create a new object), "vision-skills" (where you combine building blocks to create a new object), and "processor-skills" (where you use algorithms to design buildings and cars). Build a robot that can solve problems and beat your friends. Build up your skills, combine your poly-skills, vision-skills and processor-skills and design a robot that can do anything! Unique Key Features: 1. Build your robot like never before - Combine poly-skills, vision-skills and processor-skills to build the coolest robot on earth. 2. It's more than just a puzzle game - Create a player which can solve problems, beat your friends and explore the room. 3. The game is simple and intuitive. Nothing to learn. 4. Build your own story. You are in control. It's up to you how your robot looks. 5. It's a 3D puzzle game, which allows you to see every part of the room in a new way. You may have heard of Lovecraft's Cthulhu Mythos stories, but have you read the work of H.P. Lovecraft himself? After his first publication, he never wrote another word. This is largely because it was against his religious sensibilities to ever include something like "gambling" in his writing. But, since then, it's become easier to get your hands on the original, unaltered English translations of his works, and this has added immensely to the appreciation for the author's body of work. So, I wrote this game about this specific phenomenon: The Unspeakable! This game is built on the philosophy of Lovecraftian Horror. You experience the game as a narrator, telling a very short story about a group of colonists who are on a world beyond the fringes of our own universe. There, they found an alien artifact, that has given birth to a terrible power beyond the comprehension of mankind. The Unspeakable! The universe is totally different from the one you know: the sun is different, the planetoid is different, your civilization is different, everything is different, except the feeling. The feeling that something is wrong. Something is wrong with the cosmos. There is danger and destruction waiting around every corner. The power of the Unspeakable is beyond your grasp and you will have to fight hard to survive. How can you think that the old stories are not true? An ancient alien civilization has left a trail of signs and symbols behind it. Even if you don't believe in the existence of the Elder Gods, you cannot help but to be utterly terrified by what could be waiting for you inside the ancient tunnels of Cthulhu's domain. You feel he is coming and you must prepare. Gameplay: The base of this game is a classic first-person shooter. When you start the game you are presented with your character and both the weapons and armor you have equipped. At the beginning of the game you start with only one weapon and one set of armor, and as you progress you will gain more of both. You will move around and kill enemies with a pistol, an axe and your enemy's own body parts. You will also use armors to protect yourself. When you pick up an item it is stored in your inventory so you can use it at a later time. There are various weapons that you can get and armor that will protect you, all of them with their own special abilities. The game will progress so you will have to constantly pick up new c9d1549cdd

Facebook : Twitter : Steam : Thank you all for watching, and for your kind words, and for your support. Please subscribe, rate, and share with your friends, and may we will meet again soon! Homeland was produced from 1999-2004 by Ludozi Games, a Helsinki based development studio. The game is an espionage thriller set on the edges of a war-torn Europe. Players take on the role of the leader of a top-secret assassination team. Their mission is to eliminate key players in a vicious geopolitical crisis. Through dialogue, players learn how to craft realistic dialogue trees and then use this information to create an assassination plan. Players can then execute those plans, including striking at targets from a distance as a patrol, finding a target and approaching without being detected, and making a move on a specific target. The main storyline revolves around players' attempt to elude the ever-increasing dragnet in an attempt to secure a device called the 'Muroc' for the impending war. A global conflict will result in nuclear strike and the player's only mission is to use their skills to stop the war and save Europe from the chaos and turmoil of the end of an era. To create universal inoculation, the Ministry pooled their resources. The result is a New Ice Sabre, a state of the art ice blade with a high affinity towards manipulating Ice. Naming it after the icy Kingdom of Hoshido it will be a powerful weapon for the front line troops. It's sterilization rating is so high it can destroy any other blade on the same level if it's near the same rank. The New Ice Sabre can hone itself to a fine edge. Basically, it would only be used as a fully invested peace offering. The New Ice Saber can store Asuma, Saber, Ken, and Kairi as its User. Once the young princesses were certified, the blade will then commence firing through them and grant them an incredible surge in ability and fighting force... WEAKENED!! The New Ice Saber is a prized item of the peace negotiations with said countries. The Hoshidoka prefer the blade when it comes to enforcing declarations of ceasefire or peace treaties. Those grants them breakthrough battle power without them having to pay for air power or air superiority. It does, however, leave them wide open to attacks from these states. All they had to do was switch their stance at all times before negotiations. It's a part of the royal tradition, rather than another tactic. Everything was going as planned until they suddenly showed up during the day... Oh god, no, that can't be... Main characters: Asuma Ikaruga : The bachelor, who's the subject of desire from all around. Ikaruga is often the most impatient man in the story. Also, an Ice Knight. His fighting power can sometimes go overboard.
