*Dramatic Battle System Our action system is tightly knit with the structure of the game. When you develop your character, you will be equipped with powerful weapons, armor, magic, and skills, and will have countless opportunities to utilize them to orchestrate overwhelming attacks against the enemy. Each battle will be like an epic drama that lets you discover a gripping story of what occurred during previous battles. We have also made improvements to the battle system with the new “Ragnarok” feature. We have made Ragnarok the perfect opportunity to unleash overwhelming force with any character, such as Fenrir or the Blessing of God. Furthermore, you can utilize the new “Lane Change” feature that allows for vertical movement. Utilize your skills to reveal blind spots or empty spaces. *True-to-the-Design graphics and sound For a game that is easy to play with simple controls, the graphics and the game design follow the concept of the RPG genre. The enemy animations are detailed and complex. The game’s sound also brings out the

experience of an action RPG. *Online Play and Character Development Ever since we released “The Dazzle Refrain: Final Fantasy XV” and “The Dazzle Refrain: Persona Dancing Dance,” we have offered online play for our titles. Dazzle Refrain: Guardian Heroes is the first title where the player can connect with others to play in real-time over the Internet as a partner. Although you cannot directly connect with other players, you can tell what your partner is doing through the information they reveal during the course of the game, and together you will share exciting moments of battles and collection of items. *Original Creatures We have included special characters from the world of Elden Ring that can be added to your partner in real-time. It is a source of great pride to have transformed these characters into playable characters. There are also challenges that can be faced with your partner that will allow you to develop your character through various rewards. Even if you connect with someone who is not a playable character, you will have a story in which you can see new situations and a new reward. *Easy to Acquire and Easy to Play The game comes complete with a user-friendly interface that consists of easy-to-learn and easy-to-use controls. We offer a series of tutorials during the game.

What's new in Elden Ring:

C'mon, you're simply going to have to face the truth: you hate RPGs. Sure, you love everything else about them, but the first-person-action-RPG-with-point-and-click-interface idea leaves you cold. You can't help but fear you're going to go insane when faced with the mind-numbing pleasure of sending item after item to a random server full of way too much shit to get through all at once. It's going to be hard to beat your own record on the leaderboards and be a success in the game. What did you spend the time and money for? To explain why it's... not us? I don't know. But I really want to play some of these things so that's what I'm doing.

I'm (and Chris is) obviously not going to answer your important questions like "How far into the game can a person go before they break?" (Yes, there's a thing where you leave your journey that builds your character.) or "Does the offline part of the game work well?" (Yes, absolutely.) Let's be clear, this isn't aimed for those fighting to protect Medieval Europe and there are legit criticisms of that aspect of the game. It isn't a huge detriment to the game.

Oh, jeez. Stop making accusations and let me just try to defend myself. I'm not even done with my argument against THAT aspect of the game. Just calm down.

Sure, this won't be a genre-changing game that you'll be playing in a year, but this isn't the path to the defense of the games you're mad about. Not when the baby-pink-and-pearl party hat sword that I'm taking to Spain is no longer enough to keep the monsters at bay. Not when there's a massive maze on the other side of the castle you could be blocking right now.

I, and probably a lot of hardcore RPG fans,
